

DTO DEFINITIONS

LeadDto

```
private Integer id;  
@NotEmpty  
private String name;  
@NotEmpty  
private String phoneNumber;  
@NotEmpty  
private String email;  
@NotEmpty  
private String companyName;  
@NotNull  
private Integer salesRepId;
```

ConvertOpportunityDto

```
@NotNull  
private Integer leadId;  
@NotEmpty  
private String product;  
@NotNull  
private Integer quantity;  
private Integer accountId;  
private String industry;  
private Integer employeeCount;  
private String city;  
private String country;
```

CloseOpportunityDto

```
@NotNull  
private Integer opportunityId;  
@NotEmpty  
private String status;
```

SalesRepDto

```
@NotEmpty  
private String name;
```

AccountDto

```
private Integer id;  
@NotEmpty  
private String industry;  
@NotNull  
private Integer employeeCount;  
@NotEmpty  
private String city;  
@NotEmpty  
private String country;  
@NotEmpty  
private List<Integer> contactList;  
@NotEmpty  
private List<Integer> opportunityList;
```

UpdateAccountDto

```
@NotNull  
private Integer accountId;  
@NotNull  
private Integer contactId;  
@NotNull  
private Integer opportunityId;
```

ContactDto

```
private Integer id;  
@NotEmpty  
private String name;  
@NotEmpty  
private String phoneNumber;  
@NotEmpty  
private String email;  
@NotEmpty  
private String companyName;
```
